

# ICO 100

( Deinking agent for O.N.P )

ICO 100, as a deinking agent for O.N.P with fatty acid type, has adhesive power necessary for deinking, good dispersion, and strong infiltration and so it is a product having an excellent ink-removing power, In particular, it has an excellent effect in preventing re-agglutination of ink particle separated form the process of deinking.

## ■ Specifications ■

Appearance	: White solid state
pH(1%sol'n)	: 6.0 ~ 8.0
Ionic	: Anion
Component	: Fatty acid akali metal soap
Solubility	: Easily soluble in hat-water(40~50℃)

## ■ Features ■

1. Excellent dampness and infiltration power
2. Excellent disconnection of ink
3. Excellent penetration and dispersing power
4. Excellent adhesive power of ink in the process of flotation
5. Excellent dispersibility of ink particle in the process of flotation

## ■ How to USE ■

0.2 ~ 0.5% of notified volume

## ■ Packing Units ■

Net 100 kgs PVC or Iron drum
