

## YFC - 150

(Fluoride Adsorption Agent)

### APPLICATION

YFC-150 is an excellent remover for fluoride ion in waste water. Fluoride Ion is high concentration present in waste waters from glass manufacture, and foundry operations.

### CHARACTERISTICS

1. Easy-handling and safety agent.
2. Economical to use - Highly effective in small doses.

### HOW TO USE

1. Dose YFC-150 into the coagulant tank in waste water treatment plant.
2. Dosage is normally 30 - 500 ppm.

### PROPERTIES

1. Appearance : light brownish liquid
2. pH :  $1.60 \pm 1.0$  (20 )
3. Specific gravity (25 ) :  $1.25 \pm 0.1$
5. Freezing point : - 8

### HANDLING AND STORING

1. Protect the face and hands with a mask and rubber gloves to avoid the direct contact with YFC-150
2. In the case of the direct contact, the affected area should be immediately washed with running water thoroughly
3. Store YFC-150 in a cool and dark place
