

# LUBR-H

LUBR-H are lubricating agents, which have excellent antifoaming effect to latex & rubber manufacturing process.

## ■ Chemical Description ■

**Fatty Ammonium Sulfate.**

## ■ SPECIFICATIONS ■

Appearance	: yellowish liquid
Active Content	: 58 ± 2%
Ionic	: Cationic
pH, 1% aq. Soln.	: 4.0 ~ 4.5
Effective	: Lubricating

## ■ Features ■

1. Has excellent softness-lubricating effect
2. Gives antifoaming effect to latex manufacturing bath
3. Has releasing effect between latexes

## ■ Usage ■

According to process condition, the require amount is different, but generally 0.2~0.3%.

olution of LUBR-H and 0.1~0.2% aqueous solution of LUBR-K are  
led.

## ■ Packing ■

Net 190kg packed in Iron Drum
