

ILTOL WTB

(wetting & penetrating agent)

ILTOL WTB as a anionic surfactant has a powerful wetting, penetrating and dispersing effect in textile process(Scouring process). **ILTOL WTB** has a excellent wetting effect that without damage of silk, wool in scouring process. The surface activity of **ILTOL WTB** is outstanding even at the extremely low concentration such as 0.01%.

■ SPECIFICATIONS ■

Appearance	: Light Yellowish transparent liquid
Chemical component	: Alkyl sulfosuccinate sodium salt
Solubility	: in solvent (soluble in all solvent investigated, both polar and non-polar)
Ionic	: anionic
pH, 1% aq. Soln.	: 5.0 ~ 7.0

■ FEATURES ■

1. Excellent wetting, penetrating and dispersing effect.
2. Has good fastness to acid, weak alkali and hardness water.
3. Specially diminish surface tension.
4. Temporary has effect of emulsion and dispersing.
5. Prevent uneven dyeing in beam dyeing or package dyeing process, as prevent absorb air
6. As pre-wetting agent, if used before bleaching or kier-boiling, can accelerate process

■ APPLICATION ■

According to process condition, the require amount is different, but generally 0.5 ~ 1 g/L are recommended.

■ PACKING UNITS ■

100 or 200 Kgs PVC D/M
