

ILDYED DL90

(Dispersing & Levelling agent for dispersion dyestuffs)

■ SPECIFICATIONS ■

Appearance	: Yellow brown transparent liquid
Chemical component	: Fatty acid polyethene glycol ester
Solubility	: Easily soluble in water
Ionic	: Nonionic/anionic
pH, 1% aq. Soln.	: 6.0 ~ 8.0

■ FEATURES ■

1. **ILDYED DL90** exhibits excellent related foaming property and good dispersing ability under strict conditions, such as low liquor ratio and deep colour dyeing in polyester fabrics rapid dyeing
2. **ILDYED DL90** has low foaming property and causes no trouble what so ever resulting from foams in rapid dyeing.
3. **ILDYED DL90** excels in dye-retarding and dye-migrating properties and exhibits remarkably good leveling effect.
4. **ILDYED DL90** has little or no discharge property, thus resulting in excellent build-up (color reproduction) properties.

■ APPLICATION ■

Optimum dosage of **ILDYED DL90** is 0.5 g/L. (it is designed in way such that one half Quantity of ordinary leveling agent is enough to serve the purpose). It is easily soluble in cold or warm water. In application it can be diluted to required concentration level by adding water directly.

■ PACKING UNITS ■

100 or 200 Kgs PVC D/M
