■ SPECIFICATIONS ■

Appearance	: Yellow flake
Chemical component	: Alkyl amide derivatives
Solubility	: Soluble in warm water (around 70 – 80 °C)
Ionic	: Cationic
pH, 1% aq. Soln.	: 3.0 ~ 5.0

■ FEATURES ■

1. Imparts a excellent soft, smooth and full hand to fabrics.
2. Does not affect on color of treated fabrics.
3. Good antistatic power.
4. Good effect of finishing for softening & dry feeling cotton, velour type cotton and fabric.
5. Good antistatic power

■ APPLICATION ■

◆ COTTON

- 1) USE : ILSOFT B1 CONC 10% solution in water : 3 % (o.w.f)
- 2) Dry condition
pad(1dip - 1nip) → pick up 75% → pre dry 120 °C × 2min
→ cure 150 °C × 10 – 30 seconds

■ PACKING UNITS ■

20 Kgs paper bag
