

ILSOFT HS CONC

(fabric softener ; cationic type)

ILSOFT HS CONC is an Esterquaternary ammonium salt, cationic surfactant, which as properties that are specially well adapted to the formulation of fabric softeners, textile auxiliaries. **ILSOFT HS CONC** has a good touch for all textiles. It is soluble in warm water (around 55°C). It gives a soft and smooth touch to the fibers. And this cationic surfactant can be used with other auxiliaries.

ILSOFT HS CONC has a strong point of non-yellowing in white fabric.

■ SPECIFICATIONS ■

Appearance	: Light Yellow flake
Chemical component	: Cationic quaternary salt
Solubility	: Soluble in warm water (around 55°C)
Ionic	: Cationic
pH, 1% aq. Soln.	: 3.0 ~ 5.0

■ FEATURES ■

1. Non-yellowing of white fabric.
2. High biodegradation.
3. Stable dispersions, with High concentration (20% in water)
4. Good effect of finishing for softening & dry feeling cotton, velour type cotton and fabric.
5. Good antistatic power
6. Easily soluble in warm water.
7. Excellent compatibility with fluorescent dyes and no white degradation.

■ APPLICATION ■

◆ COTTON

- 1) USE : ILSOFT HS CONC 15% solution in water : 3 % (o.w.f)
- 2) Dry condition
 pad(1dip - 1nip) → pick up 75% → pre dry 120°C × 2min
 → cure 150°C × 10 – 30 seconds

■ PACKING UNITS ■

20 Kgs paper bag
