

ILELASEN AU20

(Anti-Pilling Agent of Wool)

ILELASEN AU20 is a special water dispersive polyurethane resin which is self-emulsion type. ILELASEN AU20 forms a lubricous film on the surface of wool, so that it prevents projection and escape of filaments. ILELASEN AU20 has an anti-pilling effect with excellent washfastness.

■ SPECIFICATIONS ■

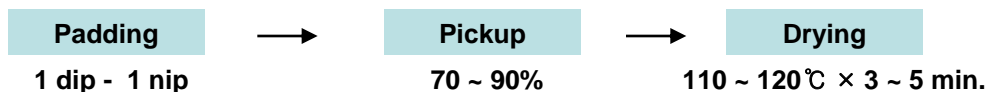

- Appearance : Milky white emulsion
- pH(1%, aq. Solution) : 6.0 ~ 8.0
- Non-Volatile Contents(%) : 20 ± 1
- Ionicity : Weak anion
- Chemical Component : Special water dispersive polyurethane

■ FEATURES ■

1. ILELASEN AU20 forms a lubricous film on the surface of wool which has an excellent anti-pilling effect.
2. ILELASEN AU20 does not impair hand of textile such as worsted fabric.
3. ILELASEN AU20 gives lubricous and soft touch to fabric
4. ILELASEN AU20 has outstanding water-resistance and solvent-resistance.

■ APPLICATION ■

1. Generally it is applied by 1 ~ 2%(o.w.f)fteners, but it depends on.
2. Treatment Conditions

3. Suggestions

- It should be tested in the lab before it is applied as commercial.
- Store over 4 ~ 10 °C, and storage stability is 4 months.
- If there is found viscosity after 4 months, stop to use.

■ PACKING UNIT ■

100kgs and 200kgs PVC Drum
